PROFESSIONAL SUMMARY

Computer Science graduate (Cum Laude) with hands-on experience in full-stack web development using Node.js, Express.js, JavaScript, PostgreSQL, and MySQL. Developed and deployed secure web applications featuring RESTful APIs, JWT authentication, and role-based access control. Passionate about building reliable, scalable software solutions and continuously learning modern technologies.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+)

Backend Development: Node.js, Express.js

Databases: PostgreSQL (Supabase), MySQL

Tools & DevOps: Git, GitHub, Docker, Docker Compose, Nginx, Render, Netlify

PROFESSIONAL EXPERIENCE

TTEC

June 2025 – July 2025

On-the-Job Training

UP Ayala Land Technohub, Quezon City

- Managed the configuration, reimaging, and deployment of over 90 workstations and laptops to support the company's Business Continuity Plan (BCP).
- Provided daily technical support on the production floor, resolving immediate hardware issues with monitors, amplifiers, and headsets to minimize operational downtime.

KEY PROJECTS

QR Code Attendance and Monitoring System for Faculty Members

Full Stack Developer | Thesis Project | Live Demo: employeeattendance.me

Tech Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, PostgreSQL (Supabase), Docker, Render

- Developed a full-stack QR code attendance monitoring system for faculty members, department heads, attendance staff, and super administrators using Node.js, Express.js, PostgreSQL (Supabase), and JavaScript, implementing RESTful APIs, JWT authentication, and role-based access control (RBAC).
- Deployed the application using Docker, Nginx, and Render, enabling reliable hosting, local network accessibility, and scalable deployment.

Student Attendance System using QR codes

Full Stack Developer | Live Demo: <https://eazyattend.netlify.app/>

Tech Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL, JWT, Render, Netlify

- Developed a full-stack QR code attendance system for administrators, teachers, and students using Node.js, Express.js, MySQL, HTML, CSS, and JavaScript, implementing RESTful APIs for attendance tracking, QR code generation, and user management.
- Implemented secure authentication features including JWT, email verification, password recovery, and session management to enhance application security.

EDUCATION

2022 - 2026: St. Clare College of Caloocan (Graduate)

2020 - 2022: Escuela De Sophia of Caloocan Inc.

2016 - 2020: Bagumbong High School

2010 - 2016: Bagbaguin Elementary School
